PCETX is working hard to bring you the best in education and training to meet today's demand for Certified plumbing professionals providing competent services to the people of the state of Texas.

SEE THE MOST INFORMATIVE CPE CLASS IN THE STATE!!!

Mr. Bobby Doran has been a master plumber for nearly 30 years and began his teaching career with Texas A&M University Engineering Extension Service at the beginning of the CPE program in 1994. He quickly saw the need to enhance the teaching criteria from the point of view of a professional who has a vast array of hands-on experience. Thus, the prospective professional student will know that if he follows the P.C.E. guide he can expect to acquire more than the minimum information to maintain or apply toward that next professional credential.

Mr. Doran volunteers his time for the Building Professional Institute Conventions along with other requested seminars throughout the state due to his knowledge and expertise in reference to the codes. He is an active member of ASPE DFW chapter, and donates his time to many different types of training towards the Health and Safety of the state.

Mr. Doran has personally contributed in the development of all of the training manuals, including writing for the CPE books, and designing of power point presentations to maximize the time-to-learn ratio to insure the best possible score on all certification tests

PCETX has built a class room facility in Fort Worth, Texas that allows PCETX to provide more continuing education for those that need more concentrated and in depth learning in their profession. This facility incorporates a relaxed and intuitive learning atmosphere with a library of film and video products as well as plumbing models to better understand today's new laws and codes. All of the shop-work necessary for the professionalism of the student is available at the new facility as well as the two story building for the Registered Apprentice training.

Any Registered Apprentice with a Drain Cleaner, Restricted Drain Cleaner, or Registered Utility Installer registration is required to take the same 6 hour CPE course as the licensees in order to renew their registration with additional qualifications.

Please contact us by e-mail, web site, or telephone for additional information.

Call for special classes to be set up for you and your company! Be Prepared Properly for the State Plumbing Examinations!!!

THE FOLLOWING ADDITIONAL COURSES ARE AVAILABLE:

1. **40 Hour Code Training Course** for those preparing for the Inspectors and Master plumbing examination. **This class will credit 40 hours towards the inspectors license.** This course is one of the most recognized programs in the state. The class consists of an in-depth study of the codes along with the explanation and understanding of the sizing tables. Learning and understanding the codes is critical for successful completion of the TSBPE examination. Homework will be issued daily along with a three hour practice test and review that will be given on the final day. **\$505.00 includes Lunch**
2. **26 Hour code training course** is available for Registered Apprentices or Tradesman wishing to take the Tradesman or Journeyman Examination. This course exceeds the minimum requirements by Board Rule. This course will prepare the student in understanding the basics and physics of the plumbing code and will prepare them properly and professionally towards the examination. This in-depth code training class has been highly regarded as the best training towards the examination for the past twelve years, even before the mandate by License Law. **Sacrificed time and proper preparation** is necessary to pass both the Tradesman and Journeyman examination with confidence. There will be homework along with an examination and review on the final day. **\$385.00 Includes Lunch**
3. **10 hour Recognized OSHA Outreach training course** is to meet the mandated requirements in the current Rules for the Registered Apprentices or Tradesman to qualify to take the Tradesman or the Journeyman examinations. This course will also benefit anyone taking the Master Plumbing Examination. **\$125.00 Includes Lunch**
4. **Medical Gas and Vacuum Certified Training Class** is to meet the mandated requirements towards the examination for the Journeyman, Master, and Inspector endorsement. This also qualifies 100 hours towards the inspector examination. The student will be issued the latest addition of the Health Care Facilities Code NFPA 99 along with other handouts. This does include the 8 hour shop-work as required by Rule. **\$565.00 includes lunch**
5. **8 Hour Math Training Course** is for the preparation for the Master Plumber's Examination. The mathematics portion is an in-depth workshop that will familiarize the individual with the formulas and conversion tables along with basic math. This course will also be advantages for a Registered Apprentice. **\$125.00 includes lunch**
6. **24 Hour Residential Fire Protection Sprinkler Specialist Endorsement training** for the licensed Journeyman, Master and Inspector wanting to receive the mandated hours towards the endorsement examination. This also qualifies 100 hours towards the inspector examination. This will **include training book** and handouts. Bobby is proud to be part of a Residential Fire Sprinkler Coalition recently established in Texas. **\$485.00 includes lunch**
7. **Recertification for Medical Gass and Vaccum endorsement.** This will include the updated information of the Health Care and Facilities Code NFPA 99 and a **NEW NFPA 99 Code Book** as required for recertification of the endorsement will be issued. **\$155.00**
8. **24 Hour Responsible Master Training Class** This will meet the requirements for the RMP status. Bobby Doran and Dr. Pepper Morton have designed a study workgroup on understanding the Plumbing License Law and Board Rules. Dr. Morton has taught management classes at both Northwood College and Texas Christian University and has been a business consultant since 1980. The course will include finance, legal, local state and federal rules and regulations, insurance regulations, customer service and marketing a plumbing business **\$485.00 includes lunch**
9. **Other seminars including 30 hour OSHA and specialized training will be conducted through the year at our new training center in Fort Worth. We are very proud of the new facility and look forward to new additional training buildings in the future on our 3 ½ acre track of land near downtown Fort Worth. These classes are posted on our web site.**
